FUNDED BY STUDENT BODY

New Changes May Force Students To Return Early

by Jim Owen

Effective the Spring Trimester 1973, the University desires from conducting pre-registrations and have only a regular registration period at the beginning of the trimester.

Circulating among the administration, faculty, and SGA is a letter from Dr. Pence, the University Registrar, containing the above paragraph and requesting their views.

In addition, the letter gives procedural changes and reasons for deletion of per-registration.

The first paragraph explains that instituting Dr. Pence's proposal will reduce the number of registration periods from 8 to 3, with a short mini-registration for the second half of the summer.

The second paragraph states that data received during pre-registration is not sufficient for the amount of work involved.

The third paragraph notes that students are forced to register so far in advance that it

generates additional changes of registration.

Paragraphs 4 through 8 list procedural changes that should be made, including:

1) A person from the flight department would help schedule student flight periods.

2) A person from the Cashier's Office would take checks from those who wish to pay immediately.

3) Financial Aid Office is to complete all financial arrangements of continuing students before registration begins.

4) Wider coverage among school publications is needed.

5) Registration by class preference with SGA policemen will be instituted.

The last paragraph request comments on the proposal.

You, the students should contact your senator, Mr. Campbell, Mr. Chrisman, Mr. Yokely, Mr. Kasler, Dean Wilson, Dean Clay, or Dean Spears expressing your views, which are needed to make a more qualified decision.

DAYTONA AVIATION PURCHASE PROPOSED BY E-RAU

by Curtis J. Poree Jr.

According to Jack R. Hunt, President of E-RAU, the university plans to buy Daytona Beach Aviation. The purchase will probably be completed by November 1, 1972.

The plan, according to President Hunt, is to utilize Daytona Beach Aviation as a fixed base operation managed by E-RAU graduates. In addition, the facility will be utilized as part of the existent cooperative education program that is currently functioning with other business organizations.

The name "Daytona Beach Aviation" will be retained; however, the facility will be a subsidiary corporation of E-RAU with profits going to the university.

It is planned that all maintenance and servicing of E-RAU aircraft will be performed by Daytona Beach Aviation under E-RAU ownership with autonomous management. In addition, general aviation aircraft will be serviced and maintained with charter service and instruction available.

Graduate A&P students will fill new job positions, at Daytona Beach Aviation, however the present employees will be retained.

The method of selection for the new manager will be by an appointed board, the manager in turn will select the new employees.

The executive committee has appointed a board of directors to be responsible for the operation of Daytona Beach Aviation. Members of the board will include Captain Kimball Scribner—Chairman,

Phillip Elliot Jr., Mrs. David Goddard, Jack Hunt, an E-RAU student and a faculty member.

Students or faculty members interested in becoming board members should submit their names to Mrs. Ethell Cornelius, the Corporate secretary in Mr. Hunt's Office, for consideration by the Selection Committee.

Also, any student interested in becoming part time employees should contact Barbara A. Ahouse at the Student Placement Office.

Proposed Changes To SGA By-Laws, passed

Change 1

Article IV, Section 1, Paragraph A, Sub-Paragraph 11, add: as provided in Article VII, Section 3 of these By-Laws. This paragraph should then read as follows:

(11) Serve as a member of the University Board of Trustees. He will also appoint another member of the SGA as the authorized additional student member of the board, as provided in Article VII, Section 3 of these By-Laws.

Change 2

Add: Article VII, Section 3 as follows:

Section 3 In accordance with the charter of the University Board of Trustees, a student in addition to the SGA President may serve on the Board.

A. Prospective candidates for this position will submit an application to the Internal Affairs Committee of the student senate. The application shall be re-

viewed by the committee and submitted with recommendation to the President of the SGA.

The President shall then appoint the representative from these applications. The student senate shall be provided with a resume of the appointee at least one week prior to a meeting at which the senate shall approve this appointment. The approval shall be confirmed by a 2/3 vote of the senate present.

(1) Any member of the Internal Affairs Committee who submits an application shall not sit on committee meetings when applications are being reviewed.

B. Requirements for Office
(1) Must have completed at least two trimesters at E-RAU and must be able to serve at least three consecutive trimesters excluding the trimester in which he is appointed.

(2) Must not be on academic or disciplinary

probation and must remain off probation during his term of office.

(3) Must be a full-time student and must remain full-time during his term of office with the exception of his final trimester.

C. Term of Office

(1) The student shall serve continuously until graduation or until he resigns or is impeached.

(2) If at any time the student leaves E-RAU, the office shall be considered vacated.

D. The above procedures shall:

(1) If possible, be initiated at least one month prior to the end of the term of the current representative.

(2) If due to unforeseen circumstances a one month period is not possible, these procedures shall be initiated immediately upon vacation of the office. A two-week period shall be allowed for applications to be submitted.

PRESIDENT HUNT TO CONDUCT USSR SEMINAR

by Curtis J. Poree Jr.

President Hunt is conducting a survey to see how many students might be interested in going to Russia on a Russian tour seminar.

The tour will be a special topics course, SS 450, offering 3 credit hours. The cost of the course is approximately \$900.00, and will include meals, transportation, hotels, as well as instruction.

The course will last 3 weeks, beginning Dec. 14. It will include tours to various manufacturing facilities and cities as well as academic institutions and aviation facilities.

A minimum of 16 people will be needed to start the course. Interested Students should contact Nan Green in admissions.

GI'S GET INCREASE IN BENEFITS

by Ron Nyhan

The Congress has passed a 25.7% increase in Veterans' benefits under the GI Bill. This increase is to be retroactive to September 1972.

The increase was disappointingly short of the proposed 47% Senate increase passed this August, with retroactivity to January 1972.

The House of Representatives passed a 17% increase in March 1972 with retroactivity to January, also. The increase gives a single Veteran \$34.98 more a month. A married Veteran without children can expect \$52.68 more.

The minutes from Congressional Record concerning the entire passage and the names of those Congressmen who voted for or against the increase is available upon request from the Used Bookstore.

SPEAKING OUT

The AVION reserves the right to edit letters as we see fit in accordance with good journalistic practice. All letters must be signed, although names will be withheld upon request from the writer.

THE OPINIONS EXPRESSED IN THIS PAPER ARE NOT NECESSARILY THOSE OF THE UNIVERSITY OR ALL MEMBERS OF THE STUDENT BODY, NOR DO LETTERS APPEARING IN THE AVION NECESSARILY REFLECT THE OPINION OF THIS NEWSPAPER OR ITS STAFF.

President's Corner

"Eau Gallie School Trip". If anyone should see Senator Andy Andersen walking around campus this week, he should pat him on the back to show appreciation of a job well done. Approximately 100 miles from here, in Eau Gallie, there are high schools that sponsor junior ROTC programs. A couple of weeks ago, one of the school board members of that area told me that they were almost 70 percent aviation oriented in that area. In reply to her comment I said, "What do you know about Embry-Riddle Aeronautical University?" Her reply was "Nothing." After the elections, I assigned Senator Andersen as the Public Relations sub-committee Chairman which falls under Internal Affairs in the SGA. In a period of weeks he has contacted the school board in Eau Gallie, coordinated with the administration, and has come up with an SGA sponsored tour of E-RAU for approximately 40 to 80 junior ROTC students from Eau Gallie high schools. Needless to say, not only will this be great public relations in central Florida, but we feel sure that after a student to student type tour, many of them will take back favorable mention of E-RAU. Thanks again to Andy Andersen.

The Dorm Council has decided that they would rather work directly with the administration in solving some of the problems inherent in the Dormitory. As a reminder to them, we have in the SGA a Dormitory Committee which comes under HEW and is headed by Senator Randy Winters. He will be more than glad to assist the Dorm Council in any way in order to get better action for their requests.

The A & P grievances, of which there are many, are being looked into by a committee. This committee is headed by Senator David Clausen. If you have any requests, grievances, or solutions to the multitude of problems, please contact Senator Clausen through his E-RAU Box No. 548.

My congratulations to the SGA this week. For the first time in almost a year in office I have just witnessed a very efficient running of last Tuesday's Senate meeting. There were items on the agenda which were very controversial, yet somehow in record time, leaving no one unaware of the facts, a change to the By-Laws was put through. Briefly, the new change outlines guidelines that the president, in the future, will follow in appointing the second member to the University Board of Trustees.

Congratulations to Paul Mercandetti! You and your By-Law Revision Committee have done a great job. Due to the eagerness of some Senators, some small amendments to the new change were not put through at this Senate meeting. However, I am sure that during our next Senate meeting everything will be finalized.

Last I would like to remind all the students that the Blood Drive will be held November 1st and 2nd. Help support it! Also, the Halloween Dance is scheduled for October 28 and will be held at the Armory downtown. Costumes are in accord, prizes will be awarded, and the band will be great (Cinderblock).

R. B. Reimann
Richard B. Reimann
President SGA

News & Views From The Editor's Desk

Tuesday, Oct. 24th, 5:30 p.m., Room 108. This is the date of an open Student Court meeting, in which Mr. Jerry Fry, president of the senior class, will plead his case against SGA president Richard Reimann.

Why is there a need for a court session? Mr. Fry will, at this time, defend the rights of his fellow senators and students.

How did this all come about? E-RAU's Board of Trustees allows two students to be members of the Board. The first student is the president of the Student Government Association. The second is a member appointed by the president. The procedure for the appointment is as follows: 1) the appointment is made by the SGA president; 2) it is presented to the SGA senate for approval; 3) if approved, the appointee is officially in office.

Last summer, Mr. Fry was appointed and approved, under the administration of Mr. Frank Mayer, to the Board of Trustees. All procedures were official according to my interpretation of the constitution.

On Oct. 5th of this trimester, President Reimann announced the appointment and self approval of Vice-president Mike Leonard to the position of student Board of Trustees member, replacing Mr. Fry. Before the new appointment was made, it was not presented to the SGA senate, nor approved. Mr. Fry, at that time, had received no letter asking for his resignation.

On Oct. 6th, a letter to General Spruance, president of the Board of Trustees, was drawn up, making him aware

that Mr. Reimann was the newly elected president of the SGA, and Mr. Leonard was the second new Board of Trustees member.

On Oct. 11th, Mr. Fry FINALLY received a letter concerning the new appointment of Mr. Leonard and was asked for his letter of resignation.

Why was this situation handled in this manner, and why did President Reimann neglect or totally deny the senate the right to approve Mr. Leonard's appointment? Could it be that the senate would not approve the change-over among Board members, and President Reimann knew this? What reason would the senate have for removing one board member who is right in the middle of many fundamental projects and replacing him with a man who could only serve six and one half months due to graduation in April? Is it really necessary to make these constant change-overs every time a new administration is in office? What can a person accomplish and what changes can he make?

This case has brought much disgrace to the name of Embry-Riddle by the unofficial constitutional procedures; by one man allowing himself to make a decision which must be made by the Student Government Association as a whole.

I urge President Reimann to "clean up his act" by living up to his promises given in his inauguration speech, i.e.

"...in no way will I attempt to run or dominate this SGA. I feel that the people who are in this organization now are mature and intelligent enough to get the job done."

This whole unfortunate matter could be settled if the senate would be allowed to do its job and their ruling on the appointment of the Board of Trustees member be the final word. If not, I foresee only unhappiness, shame, and scandal for President Reimann.

May I also urge all students to attend the Student Court on Tuesday, if this issue has not been settled. It will give you an opportunity to see exactly how the Reimann administration is working. You can then formulate your own opinion.

LETTER TO AVION

Dear AVION:

I have very strong feelings about our excellent grade of student drivers.

Since I returned to school in August, my car has been struck 3 times while parked around school. Each one has left a good size dent which will be costly to repair. The persons responsible for this were not thoughtful enough to tell me.

My car was not designed for a demolition derby, and I sure don't want it to look like it has been in one.

What we need around here are people to look before putting their cars in gear. These things could be avoided and the costly repairs would be saved.

I am thoughtful enough to watch out for other cars and all I can ask is the same respect from you.

Remember only you can help prevent this from happening again.

DINING OUT

COINS

AWARDS

SCHOLARSHIPS

Dining Out Goes To Fritze's

by Charles McMahon

Fritze's Old Timers is something different! Travel 4 miles south of the Port Orange Bridge on South Atlantic Avenue to find this unique restaurant and night spot.

You enter Fritze's dining room through the lounge where the walls are covered with auto-graphed straw hats, setting the tone for the old timers theme. The dining room contains large picture windows facing directly on a deserted stretch of ocean beach. The whole atmosphere is rustic, and dress is strictly casual.

The meals served at Fritze's (mainly seafood and prime cut steaks) are well prepared and delicious. You salad lovers will enjoy the

salad bar which features eight or nine different salads and dressings. Help yourself to as much as you like! Another nice touch is the hot loaf of homemade bread served at each table.

In addition to serving great food at very reasonable prices, the Old Timers also has entertainment.

On Friday and Saturday nights from 9 to 1, there is live big band era music. Everyone joins in the fun with a lively sing-along, creating a friendlier atmosphere than you're likely to find at any other night spot in the Daytona Beach area.

Give Fritze's food a try, and don't let the name Old Timers mislead you. Fritze's caters to all age groups, and all age groups join in the fun!

Sullivan Receives ROTC Student Award

by Jim Owen

William (Mike) Sullivan spent six weeks of his summer vacation at the Third Army R.O.T.C. Summer Camp, and received the Distinguished Military Student Award for his efforts.

The award is given to the Army R.O.T.C. cadet who shows outstanding military leadership and a high aptitude for military training at the Summer Camp. It is usually given to someone in the top 5% ("walk on water" category).

Mike Sullivan, who is well known for his war stories, came back from camp with a whole new group telling how he got to use the classroom lessons.

His hosts, the 82nd Airborne (all-American boys), first showed the cadets how to operate the equipment and then stepped back and let the cadets take over. The cadets got "hands on" experience driving tanks and A.P.C.'s; firing the tank, howitzer, 105 and

155 in both direct and indirect mode; dropping 81 m.m. mortars; blowing claymores; tossing hand grenades; and shooting the 45, M14, M16, M79, and L.A.W.S.

Space and editorial policy prevents me from repeating any of the stories, but if you want to listen for a couple of days, just crank Mike up with a few well placed questions and then relax. Be careful though; he almost talked me into joining Army R.O.T.C.

More On Coins

by Joe Green

Collecting rotated dies is an interesting part of numismatics. It's inexpensive, makes a fascinating display, and everyone of these coins can be found in circulation.

If you take a coin between your fingers upright and slowly turn it around, you can see that the obverse and reverse designs are up-side down. This is normal, however, some coins are found to have both sides upright, or one design rotated from 5 to 360°.

This happens when a die is loose, either top or bottom. Then, the resulting coin will have a rotated front or back.

The bottom die, the reverse, is the one that will usually cause this error. This die is stationary, and set in place by a lock screw. A loose lock screw will cause this die to vibrate or shift.

The upper die is also set in place by a lock screw, but usually if this lock screw becomes loose, the die will fall out of place.

A collection of this sort is relatively easy to collect, and makes a unique and colorful collection.

What sort of a value can you put on a collection of this sort? Well, it's hard to say. The condition of the coins, denomination, and degrees of shift are important. Usually, values are determined by supply and demand, and what the market will bear.

Scholarships Awarded For Fall

The Scholarship Committee has awarded the following scholarships for the Fall Trimester: Elion Krugman (\$100), Vicki Smith (\$300), Nancy Lucas (\$300), William Woody (\$100), Darius Daranjia (\$100), and Daniel Horting (\$100).

Congratulations to all recipients of these scholarships.

The Death of the Convertible

by Bob Butterworth

Those were the days. Ingrid Jay's father bought a new Ford convertible every year. If questioned then, or even now, about which I liked more, Ingrid or the car that smelled of new leather and even newer canvas that I would be permitted to use when escorting Miss Jay, I would be hard put to come up with an honest answer. After all, a convertible--a Ford convertible--by the mores and morals in force at the time was as much a puberty rite as a girl whose brown eyes glistened like tidal pools and whose upturned nose supported a light dusting of freckles. Sitting in an open car under a star-filled sky, mouthing lines cribbed from an old Humphrey Bogart movie hasn't left any psychic scars. Too bad my kids won't be doing the same thing.

Today it would necessitate a long journey, presumably back in time, but if not, at least in distance, to a place where the air is clear enough so that you can see the stars, and lonely enough so that you aren't afraid of being mugged. It's a problem I'm glad I don't have to work out, all of which may have some bearing on the decision of the major automobile manufacturers to discontinue building convertibles starting with the '73 model year.

The computers say that the Mr. Jays are dead. He flew fighters during the Korean War, and that may have colored his approach to automobiles. In an open car you were flying. But there are a number of reasons why the convertible will no longer be produced in the U.S.

The industry watchers talk about the increase in popularity of the hardtop, on top of which came the vinyl roof that gave a car the very look and texture of a con-

vertible. Add to all of this the consumer preference for air conditioning, they say, and also the sales of Ford convertibles slipping from a high of 123,000 in 1965 to 16,000 five years later. In addition there is the convertible's inability to resist any thief with the price of a pocket knife. Then too, there is the question of safety. And all this is not to mention the fact that the air in one of today's urban centers will eat through a top in less than a year.

So there you have it, the modern convertible being put down by pollution, crime in the streets, an armored car approach to safety, conformity, and computer marketing techniques that always give the mass buyer what he wants. Why did it really die? The quick answer seems to be that it was an ageless, unchanging design that ran head on into a changing world.

But I have other more personal reasons. We had our heads down, busy getting and spending, and when we looked up, our favorite car was gone. Yes, we were the generation that grew up knowing that man's highest attainment was a convertible, but became preoccupied with the means of attainment to allow its goal to exist.

Mr. Jay had the formula. So did Ingrid who was far ahead of her male peers. Even if I didn't get the girl, I got the idea. An open car was one you drove.

A closed car was one that drove you. If this is an imperfect syllogism, blame it on the fact that it was steamed from the fevered brain of a 16-year-old who had come within a whisker--or lack of one--of total victory.

SPORTS WORLD

SIGMA CHI TEAM OF THE WEEK

Soccer Team Wins Again

by Rory Donnelly

Embry - Riddle Aeronautical University ran their winning streak to four games in a row with a 4-2 win over Florida Institute of Technology last week-end. The game, played in Melbourne, enhanced the Eagles chances of repeating last year's undefeated season.

From the first goal scored by Riddle's Monolu Johnson, the outcome of the game was never in any doubt. Johnson was the only regular that started in the game. It was his third goal of the season.

All of the other three goals for E-RAU were scored by a new player on Coach Mansfield's front line, Albert Ntaba, from Malawi, South Africa, is sure to add strength to the already well balanced attack of the Eagles.

Next Saturday, the Embry-Riddle Eagles will play host to Oglethorpe University of Atlanta, Georgia at the airport field. Game time is two o'clock.

TENNIS

There will be a tennis movie on Tues, Oct. 14th at 11:15 in Room 110, Building A.

The movie will be covering the Kemper Tournament. It is open to anyone interested. It is about a 40 minute film.

E-RAU FALL VOLLEYBALL SCHEDULE

Date	6:30 Game	7:30 Game	8:15 Game
Oct. 10	Faculty-Phoenix	James Gang-Spikers	Delta Chi-Bye
Oct. 17	Faculty-Spikers	Delta Chi-Phoenix	James Gang-Delta Chi
Oct. 24	Faculty-Delta Chi	Phoenix-James Gang	Phoenix-Spikers
Oct. 31	Faculty-James Gang	Delta Chi-Spikers	Playoff if necessary

Sigma Chi Fraternity continued a fine winning streak by blanking Lambda Chi 20-0. The team was lead by Mike Plantz, quarterback, who passed for two touchdowns and ran for one more. Mike's favorite receiver for the day was unstoppable Terry Gardner who caught everything thrown his way.

The defensive squad continued to be the

strong point of the team. Captained by Mark Rodgers, they have been scored on only once the entire season. Dan Rees managed to snag three interceptions for the day and one punt return to help set up the scoring.

Sigma Chi is much improved over the beginning of the season and will be a definite contender for the number 1 spot in the league.

.*&&&.* Mosquitos!

FOOTBALL

by Bob Argila

The intramural football league is getting tougher every week and this past Sunday there was a lot of hard hitting, as each team tired to stay in contention.

The Delta Chi Jets met the Sunshine Company in the 9:00 AM opening game and both teams went into this week, undefeated. The first and only score was a safety by the Jets when they punted and caught the Sunshine Company runner in the end zone. Both defenses would not budge the rest of the game and the final score wound up at 2-0!

A vastly improved Cowboy team romped over the Sigma Phi Delta squad 25-0. An interception by Gene Columbo, and another one by Brian Welch were returned for touchdowns and started things off. Welch also ran for a touchdown and hit Jack Hutchinson with a pass for the final score.

The Vets also remained undefeated as they beat the Coyotes, 8-0. This was another close game for the first half but a touchdown by Mike Talyor broke the ice for the Vets Club. The stubborn Vet defense also racked up another safety this time lineman Stan

Steenbock caught the Coyote runner in the end zone. The Vets remained tied with Delta Chi for first place honors.

Sigma Chi, who has been really surprising everyone this year, got together to whip Lambda Chi Alpha 20-0. Three interceptions by Dan Rees and fine passing by quarterback Mike Plantz to his favorite receiver Terry Gardner, put the pressure on Lambda Chi. The win moved Sigma Chi up to 2nd place and left Lambda Chi in last place.

The standings after 4 games are as follows:

Team	W	L	T
Delta Chi Jets	4	0	0
Vets Club	4	0	0
Sigma Chi	3	1	0
Sunshine Co.	2	1	1
Cowboys	1	3	
Coyotes	1	3	
Sigma Phi Delta	0	3	1
Lambda Chi Alpha	0	4	

No games will be played this week because of the holiday on Monday. The games will be rescheduled later.

IMPORTANT: Intramural football meeting Tues. Oct. 24, 6:00PM in Room 107, Bldg. A. Three representatives from each team must be there.

BASEBALL practice Sat. 21 at 5:30 PM at the Baseball Field.

Don Kent vs J.M. Fields

by John Miller

The following is the sequence of events that occurred during an Embury-Riddle student's attempt to purchase a television set.

Don Kent began shopping for a certain model of a television set in September of this year. When he visited J.M. Fields, Don was told that if he could furnish written proof (such as a C.O.D. slip) that he was able to purchase the same model elsewhere for less money, then J.M. Fields would "double the difference" between their cost and the lower cost and subtract the amount from the original J.M. Fields cost.

20 Sept.--Don went to K-Mart and ordered the set on a C.O.D. basis for \$385.00. Don returned to J.M. Fields and showed the proof of purchase to the salesman. The salesman doubled the difference between the K-Mart price and the J.M. Fields price (\$429.00), and arrived at a new cost of \$357.00 (plus tax). Don and the salesman proceeded to the credit department to arrange financing. Don was told that the set would be delivered by Saturday, Sept. 23 or Monday at the latest.

21 Sept.--Don returned to J.M. Fields. Credit department personnel told him that they had not yet handled his paperwork but would handle it the next day. The television department salesman said that the set could not be ordered until credit was approved. Don told them he would pay in cash and wrote a check for the set. The salesman accepted the check and told Don that the set would be ordered the next morning.

22 Sept.--Don deposited the money in his checking account at 8 a.m. At 4 p.m. he called J.M. Fields to ask if the set had been ordered. He was told that his check had not cleared the bank and that the set had not been ordered. At 5 p.m. Don visited the bank and the amount was hand posted to his account. Don returned to J.M. Fields and was told that he had been undercharged \$3.00. He wrote another check which was accepted. The salesman told Don that the set would be ordered the next morning.

25 Sept.--Don called J.M. Fields, asking if the set had been ordered. He was told that it was and that he should receive it on 27 Sept. 26 Sept.--Don called J.M. Fields asking what time the set would be delivered on 27 Sept. He was told that the time was not known because the set had not arrived at the store.

27 Sept.--Don called J.M. Fields to ask if the set would be delivered on

that day. He was told no. Don then called the store manager and told him the situation. After conferring with the department manager, the store manager told Don it was thought that he was trying to "pull a fast one". Don said that he was not, that he only wanted the television, and that J.M. Fields was only stalling. The store manager said that he would settle the situation one way or another and Don would get either the set or his money back. Don said that he wanted the television set. This ended the conversation.

28 Sept.--Don called J.M. Fields to ask if the set had arrived. He was told that it had not, but that it would be delivered later that day or the next day.

30 Sept.--Don called J.M. Fields and was told by the television salesman to call the store manager. The store manager told Don to come to the store. When he arrived, Don was told by the department manager that the store manager would not allow the sale because the sales slip from K-Mart was not valid. Don told the department manager to call K-Mart to verify its authenticity. The department manager left for a few minutes and upon returning told Don that J.M. Fields was not going to sell him the set anyway (implying that authenticity had been established). The department manager said that it was the store manager's option to deny sale and Don's money would be returned. Don said that he wanted the set and asked to see the store manager. Don was told the store manager did not want to see or talk to him.

Deciding that further efforts to communicate with J.M. Fields would be pointless, Don took the issue to small claims court. At this time the issue is pending until court hearing on November 2nd. Further comment on the situation will not be published until a decision is reached.

Daytona To Honor POW's

by Ron Nyhan

On Monday, October 23, there will be a Freedom Tree planting sponsored by VIVA, Voices in Vital America and the Daytona Beach Arlington Garden Club at the Riverfront Park on Beach Street in Daytona Beach.

The Freedom Tree will be planted in honor of Cpt. David Gray, son of Mr. and Mrs. David Gray, Ormond Beach. Gray has been listed as a POW for six years. The tree

will also serve as a reminder that there are still 1900 POW-MIA's in Vietnam.

VIVA, who will co-sponsor the event, is the student organization responsible for the POW-MIA bracelets, and many other activities similar to the Freedom Tree planting.

The first Freedom Tree was planted in California earlier this year. The planting here Monday will be the sec-

ond of such ceremonies. The E-RAU Veterans' Association has unofficially, for the last year, been a district branch of VIVA. The club helps to distribute bracelets, pamphlets, and bumper stickers through the Used Bookstore on campus and throughout Central Florida.

The ceremony is expected to be short and all students at E-RAU are cordially invited to attend.

Let's Keep Pre-Registration

Dr. Pence has suggested that E-RAU do away with pre-registration, citing cost and the early date of registration as the main problems, the latter causing too many add/drops.

I agree with his reasons, as they are unrefutable, but the conclusion is unpalatable. Citing his reasons, and including many more, I suggest the school institute three split registrations. What do I mean by split? Each registration could be split into 2 sessions, one a couple of weeks before the end of the trimester and the other during the break.

My reasons for this idea are concluded as follows:

1) Near the end of a trimester most students are aware of their class standing and know what they need or want for the following trimester.

2) If the advanced session of registration is near the end of the trimester, there will be no need to complete the mounds of paperwork presently attempted after pre-registration. In a few weeks the "break" registration period will start. This would reduce the cost to the school.

3) This will benefit the students who attend classes year around, by giving them a period before the end of each term to register, giving them more time away from school. (Using 1972 as a guide, the break would include 33 weekdays vs 15 weekdays under Dr. Pence's plan.)

4) Those students who remain at E-RAU during the Summer terms get additional advantages.

5) Those marginal students who return to E-RAU because they are registered and paid would continue to return instead of having to face the hassles and frustrations of registering.

6) The advanced registration reduces the long and tiring lines.

If 800 students trying to pre-register causes great problems, just imagine what 1700 students would do to registration.

The reason for Dr. Pence's study was to determine the causes of over 2000 add/drops processed this trimester. It concluded that registering in March for a trimester starting in September caused the majority of these add/drops. Therefore, this study suggested to do away with pre-registration. A more correct suggestion would be to make advanced registration closer to the start of the next trimester.

I made a small unofficial study using some add/drop slips I re-

ceived. The dominate reason given: "I first registered for anything to get into the system." When interviewed further most stated, "my class was closed so I put some thing else in its place, then waited for add/drop to get in the class of my first choice."

"Everyone knows they open classes after pre-registration, so I just waited until they opened a class which fits my schedule better."

Surprisingly, a high percentage of people said, "They changed my class time so I moved to another class."

"Last March I registered to stay on guaranteed tuition, then took part of the summer off."

From this survey, the March (or early) "pre-registration" should be dropped and replaced with a later "advanced registration session." More importantly, the problems of closed classes must be delt with and changing class time must be stopped.

If you have any comments for or against any of the plans, either the present system, Dr. Pence's plan, or mine, please see Dr. Pence, Dean Spears, Dean Clay, Dean Wilson, Mr. Kasler, Mr. Campbell, Mr. Chrsman, Mr. Cunningham, Mr. Yokely, your senator or especially me. Jim Owen

Embry-Riddle Speech Forum

by John Miller, Jr.

A speech forum will be presented here on Monday night, the 21st of November. The forum, sponsored by the Division of Humanities and Social Sciences, will be researched, organized, and presented by ten students chosen from the speech classes. (2 from each class.) Divided into two teams, the students will discuss a particular aspect of contemporary society. Topics of past forums have included drug abuse and consumer problems.

The exact time and location of the forum and the names of the chosen members will be announced at a later date. The forum will be open to the public and refreshments will be served during intermission.

DECEMBER GRADUATES --- Please come by the Dean of Men's Office to be measured for cap and gown.

Today's Music

by Rory Donnelly

Going back to nature seems to be the big thing this year and many rock groups are jumping onto the bandwagon. The Eagles are just one of these new combination rock-western bands.

Composed of Bernie Leadon, guitar, banjo, and vocals; Glenn Frey, vocals and slide guitar; Randy Meisner, bass and vocals; and Don Henley, vocals and drums; the Eagles have one thing in their favor, there is only one way for them to go-- up. They have alot of growing up to do, but with the potential that they have it shouldn't be too difficult.

Their recent album, which is untitled, shows much of the same style used and popularized by the Byrds in their Untitled album of two years ago. This is extremely noticeable in the first cut of their album "Take It Easy". It is one of their smiling songs that is good to hear every so often. When you turn up the volume on this one, the fancy banjo pickin' in the back ground comes through.

There is only one other song on the first side that I was impressed with, "Most Of Us Are Sad". Here, the pace is slowed down and some beautiful cords are played and sung by Glenn Frey, who wrote the song.

To me, side two does the group alot more justice than side one. Peaceful is the only word to describe the first cut on this side, "The Train Leaves Here This Morning". It creates a lonely kind of mood and is reminiscent of the traveling songs popularized by the Byrds. It was written by Leadon and in it his voice is as clear as the accoustic guitar he plays.

Spotlight

by Joe Green

If they would get rid of the garbage (the imitation bird calls) at the beginning of "Early Bird" the potential of the Eagles could be better seen. Here, all the voices blend together well and Leadon's banjo playing stands out.

The final song, "Tryin'" exhibits some fancy guitar playing that, if listened to carefully, could be mistaken for Clapton or Beck.

"Peaceful Easy Feeling" has the same tone as "Train Leaves Here This Morning" and is with out a doubt my favorite cut on the album. The title of the song is a perfect fit, as are all the lyrics to this song. The words are the only thing better than the slide guitar playing of Glenn Frey.

All the songs on the album are original and the band members are all quite talented. In the long run, what you get from the Eagles are extremely enjoyable sounds, though not particularly original melodies or lyrics. This album shows much promise in the future from the Eagles.

Embry-Riddle did it again! That's right, another outstanding educator has been added to the University's academic faculty.

He is Mr. Donald J. Kemeraut, who will be instructing Management and Law.

Mr. Kemeraut is indirectly a native of Daytona, although he originally came from Ohio. He has been here for 18 years. In 1967, he left to attend the University of South Florida to complete his degree in Management. While at South Florida he was a graduate assistant and taught several courses.

He is married (sorry girls) and has four children.

Mr. Kemeraut expressed his desire to teach at the college level because of the dedication and enthusiasm of the students. He considers his vocation and teaching experience at Embry-Riddle ideal, and is more than happy to be here.

Let's all extend a hearty welcome to Mr. Kemeraut.

Sat. Nov. 11--IFC Road Rally.

Sat. Nov. 18 -- DBSCC sponsored night autocross, followed by short rally.

Check The Avion for further times and dates.

November will be a big month for sports rallies. The following is the tentative schedule of events.

Sat. Nov. 4--DBSCC annual Hare & Hound Rally.

AROUND CENTRAL FLORIDA

by L.E. (Andy) Andersen

One of the closest attractions to Embry-Riddle is Marineland. It is located on U.S. Highway 1A, approximately 30 miles north of Daytona Beach. The drive along the ocean is leisurely and scenic. An alternate route is via Interstate Highway 95, but the hustle-bustle of the traffic seems to detract from the outing.

For over a third of a century Marineland has entertained, educated and amazed millions of visitors with an unequal display of marine life. Hundreds of species can be viewed, photographed, and studied in near natural habitat.

The admission to Marineland is reasonable and would not particularly stress even the smaller budgets of the college student. One admission price opens the doors of the entire Marineland complex. Within the complex, one will find sufficient attractions to occupy him for a couple of hours or a full day.

The main attraction at Marineland is the porpoise show. This 30 minute show demonstrates a few of the various talents of these remarkable mammals. During their very entertaining half hour, they will jump, "sing", dance, play ball, and retrieve rings while blindfolded. This last demonstration very clearly points out the "Sonar" of the porpoise and demonstrates his ability to find objects without seeing them.

The Marineland complex has two feeding tanks. Suspended over the circular tank is a movable platform. The attendant gets into this bucket type platform and moves it out over the pool at a height of 10 feet. He is equipped with a generous supply of fish, which he gladly feeds to any porpoise that is willing to jump up and take the fish from his hand.

Adjacent to this tank is the rectangular tank, and it contains nearly every imaginable species of salt water fish. The feeding method in this tank is somewhat different from the circular tank, as the attendant is now equipped with a "hard-hat" diving suit and physically walks around the bottom of the tank, hand feeding the various species. As the shark is one of the occupants, this man uses extreme caution in his feeding circuit.

A very interesting side-light about this tank and its inhabitants was brought to light by their announcer. Many of the species within the tank come from tropical waters. Therefore,

the water in the tank has to be heated during the winter months to sustain proper temperatures for these fish. I thought this rather unusual in Florida.

There are other displays and tanks at Marineland which will have to be seen when one visits this interesting and educational attraction. Your time spent is well rewarded not only with enjoyment but also with knowledge.

Placement

The Marine Corps Officer Selection Team will be on campus at the Student Center, Monday and Tuesday, October 30 and 31, from 9 a.m. to 4 p.m.

Good luck to the Airframe and Powerplant Technicians who are completing course requirements this week. If you haven't been by the Placement Office to check on employment opportunities and to complete your graduate placement form, please do so. There are approximately 30 available jobs listed for Airframe and Powerplant technicians.

For those seniors graduating in December, please fill out the graduate placement form at your earliest convenience. If you desire assistance with a resume and cover letter, please don't wait until the last minute to accomplish this.

We have received the 1973 College Placement Annual which you may borrow to reference.

Also, I have available, for handout, a brochure on interviewing which may give you some helpful tips.

The new Aviation Employment Report should be arriving around October 20.

Loans Are Available For You

The Financial Aid Office at Embry - Riddle Aeronautical University has a number of financial aid programs available for students with a monetary need. Eligibility is based on a confidential application from the student for assessment of his financial position. Under the various aid programs an applicant must be a full-time student, make normal academic progress, and be of good character and citizenship. Although formal awards cannot be made until an applicant is accepted by the University, prospective students are encouraged to apply as soon as possible for assistance.

The College Work-Study Program provides part-time employment for students, particularly those from low-income families. The part-time schedule may involve work for the University or a public or private, non-profit organization in the community.

The Educational Opportunity Grant Program provides federal assistance to those not financially able to attend the University without a grant.

A new program, the Florida Student Assistance Grant Program, is available for qualified Florida residents who have an exceptional need for college funds. The maximum grant available is \$1200 per academic year with priority given to entering freshmen and transfer students.

Pursuit of a college education is very taxing in effort, money, and time. The rewards and opportunities for college graduates are increasingly attractive, especially in aviation related fields. Embry-Riddle Aeronautical University serves the needs of both students and industry as the world's only totally aviation oriented university with six degree disciplines, a Maintenance Technology Program, and a Professional Pilot Program.

The Federally Insured Student Loan is a program designed to meet the needs of students from middle and upper-income levels. This program involves student application to financial institutions such as participating banks, savings and loan associations or credit unions.

Another loan program, the National Direct Student Loan, provides a maximum of \$1500 per academic year for undergraduate studies. Repayment of the loan with 3% interest usually begins nine months after the borrower ceases to be a full time student with 10 years to make repayment. Postponement of repayment may be granted for as much as three years if the borrower is subsequently serving in the Armed Forces, Peace Corps, or VISTA.

Is there any truth to the rumor,
No Dollars No Pence!

Skyshark III?

Green Action "SUPER HACK" MISSING

by Gene Wages

(Irgend jemand erfuhr eine Niederlage) translated means someone got destroyed and that's literally what happened during Sunday's intercollegiate match between Embry-Riddle, St. John's College of Palatka, and Florida Institute of Technology of Melbourne. Paul Loughrey, Stan Bartlett, John Bishop, and Gene Wages turned in a blazing four man total of 333 to beat St. John's and F.I.T. by 7 and 36 strokes respectively. This was the first time that a three way match has been won in its entirety by the E-RAU golf team. Gene Wages had a splendid day on the greens and sank a total of four birdie putts.

Bill Georgeff has gained the distinction of being the most likely to succeed and has been playing extremely well during the past two weeks. Bill participated in today's tournament and played a nice round. (You should see his caddy.) Today's action was blessed by the presence of Mrs. Patty Bartlett, Thel Georgeff, and Janice Bishop which enhanced the attitude of all golfers, especially their husbands. A special thanks goes to Thel Georgeff for staying with Coach Spears during the final rounds and helping to suppress any anxieties that he may have had prior to the score being posted. Dean Spears intended to present a "Super Hack" award this week but Walt Guy has suddenly disappeared.

Additional tournament results for 17 October at Stetson and 20 October at Sugar Mill (New Smyrna) will be concluded in next week's Avion. Anyone desiring to participate in competitive golf, contact Dean Spears at his office in the administrative building.
